Group A
Food Recommendation System
User Stories

Feature: Food Order Recommendation

As a user of the food order recommendation software, I want to be able to easily find and order food items that meet my needs.

Scenario: User searches for food items

Given the user is on the home page

When the user enters a search query for "Italian food"

Then the user should see a list of recommended Italian food items

Feature: Food Order Recommendation

Scenario: User filters food items by price

  Given the user is on the home page

  When the user selects a price range of $10-$20

  Then the user should see a list of food items within that price range

Feature: Food Order Recommendation

Scenario: User saves favorite food items

    Given the user is on the food item page

    When the user clicks the "Save" button for a food item

    Then the food item should be added to the user's list of favorites

Feature: Food Order Recommendation

Scenario: User receives personalized recommendations

    Given the user has ordered food items in the past

    When the user logs in to the software

    Then the user should see personalized recommendations based on their past orders

THANK YOU
